HISTORY: Eric Charles and his five piece indie rock band starting performing live in 2013 after Charles completed his demo solo album, Another Trip. The independent release of this record, quickly garnered national attention. The band was then chosen to showcase at Big Music Fest, Canada’s largest outdoor festival in 2014. Shortly after this performance, Charles headed back into the studio to edit a “radio mix” for the single, In for the Ride. The track was added into rotation on several North American commercial radio stations while the band continued to perform in Toronto and surrounding areas, developing a following and impressing thousands of new listeners.

With the excitement and buzz building, Charles met with multi-platinum producer Gavin Brown to discuss re-recording the entire demo. Gavin and his team took on the project and booked the band into the elite Noble Street Studios in Toronto.
